

## QUALITY, ENVIRONMENT AND HEALTH AND SAFETY POLICY

**BEEPLANET FACTORY**, we develop technological projects based on second-life batteries from the electric vehicle sector.

**BEEPLANET FACTORY**, we are an expert team in engineering and operations that deals with the complete process: from the moment the battery is removed until it is placed in a second monitored application and until its end of life.

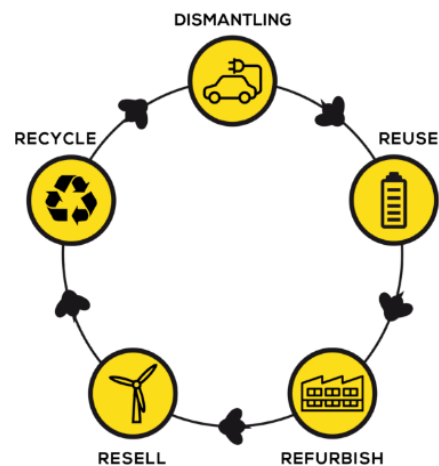

We are committed to:

 Analyzing the **risks and opportunities in all our processes** and setting **quality, environmental and health and safety objectives** for their achievement.

 Providing safe and healthy working conditions for the **prevention of work-related injuries and deterioration of health**. Promoting the **participation and consultation** of the entire team

 **Minimizing environmental impact**, protecting the environment, and preventing pollution.

 That all products are in compliance with all **legal and other applicable requirements**

The management of **BEEPLANET FACTORY**, undertakes to **make this policy available to interested parties** and to review and adapt it periodically.
